
Index

A

| | |
|--|------------------------|
| Adsorption chromatography, overview of | 18 |
| Affinity purification, overview of | 166 |
| Agarose, types of, for DNA separation | inside back cover page |
| Agarose gel | |
| – running buffers | 224 |
| Agarose Gel DNA Extraction Kit | 108 |
| Amplification of DNA, see chapter 8 | 212 |
| Automated Nucleic Acid Isolation | 206 |

B

| | |
|--------------------------------------|-----|
| Biotin-labeled oligo(dT) | 167 |
| Blood | |
| – human, DNA from | 23 |
| – mouse, DNA from | 23 |
| Buffy coat, preparing DNA from | 23 |

C

| | |
|--|------------|
| Carrier RNA | 89 |
| Cell culture supernatant, purifying nucleic acids from | 82, 87, 92 |
| Cell disruption | 14 |
| Cell lysis | 14 |
| Centrifugation, overview of | 15 |
| Companion Reagents for Isolating Nucleic Acids | 234 |
| Concentrated DNA, preparing, see | |
| – Agarose Gel DNA Extraction Kit | 108 |
| Culture supernatant, preparing nucleic acids from | 82, 87, 92 |

D

| | |
|---|---------|
| Deparaffinization procedure | |
| – for FFPE tissue in reaction tube | 69 |
| – for FFPE tissue on a microscope slide | 70 |
| Differential Display RT-PCR, preparing RNA for, see | |
| – High Pure RNA Isolation Kit | 53 |
| DNA | |
| – concentrated, preparing | 108 |
| – hints for handling | 218 |
| – shearing of | 218 |
| – simultaneous isolation of RNA and protein | 159 |
| – storing | 218 |
| DNA Isolation Kit for Cells and Tissues | 148 |
| DNA Isolation Kit for Mammalian Blood | 140 |
| DNA isolation from | |
| – agarose gel slices | 43, 108 |
| – bacteria | 26 |
| – blood, buffy coat, cultured cells | 23 |
| – formalin-fixed, paraffin-embedded tissue sections | 26 |
| – guinea pig blood | 142 |
| – gram-positive bacteria | 29 |
| – mammalian blood | 140 |
| – mammalian tissue | 25 |
| – mouse blood | 142 |
| – mouse tail | 25 |
| – mycobacteria | 27 |

| | |
|---------------------------|-----|
| – PCR product mix | 42 |
| – plasmid mini-prep | 47 |
| midi-prep | 122 |
| maxi-prep | 129 |
| – rabbit blood | 140 |
| – rat blood | 141 |
| – yeast | 26 |

E

| | |
|--|-----|
| Electrophoresis, overview of | 15 |
| Erythrocytes, in blood | 227 |
| Ethanol | |
| – precipitation of DNA with | 14 |
| Expand PCR, preparing DNA for, see | |
| – High Pure PCR Template Preparation Kit | 21 |
| Extraction methods for nucleic acid | 14 |

F

| | |
|---|-----|
| Fecal cultures, preparing DNA from, see | |
| – High Pure PCR Product Purification Kit | 40 |
| Fixed tissue sections, preparing DNA from, see | |
| – High Pure PCR Template Preparation Kit | 21 |
| Formalin-fixed tissue sections, preparing DNA from, see | |
| – High Pure PCR Template Preparation Kit | 21 |
| – High Pure FFPE RNA Micro Kit | 71 |
| Formulas, reference | 220 |

G

| | |
|--|----------|
| Gel, see <i>Agarose gel</i> | 224 |
| Gel filtration chromatography, overview of | 194 |
| General conversion tables and formulas | 220 |
| Genopure Plasmid Midi Kit | 122 |
| Genopure Plasmid Maxi Kit | 129 |
| Genomic DNA | 140, 148 |
| Glass fibre fleece | 19 |
| Glassware, RNase-free | 218 |
| Guinea pig blood, preparing DNA from | 142 |

H

| | |
|---|-----|
| High Pure FFPE RNA Micro Kit | 67 |
| High Pure PCR Product Purification Kit | 40 |
| High Pure PCR Template Preparation Kit | 21 |
| High Pure PCR Cleanup Micro Kit | 33 |
| High Pure Plasmid Isolation Kit | 47 |
| High Pure RNA Isolation Kit | 53 |
| High Pure RNA Paraffin Kit | 73 |
| High Pure RNA Tissue Kit | 62 |
| High Pure 96 UF Cleanup Kit | 113 |
| High Pure Viral Nucleic Acid Kit | 87 |
| High Pure Viral RNA Kit | 82 |
| High Pure 16 System Viral Nucleic Acid Kit | 92 |
| High-throughput purification of PCR products, see | |
| – High Pure 96 UF Cleanup Kit | 113 |
| Hints for handling nucleic acids | 218 |

| | |
|--|---------|
| I | |
| Introduction to nucleic acid purification | 14 |
| Ion exchange chromatography, overview of | 14, 120 |
| Isopropanol, precipitation of DNA with | 14 |
| L | |
| LightCycler® 2.0 Instrument | 216 |
| LightCycler® 480 Instrument | 216 |
| M | |
| MagNA Lyser Instrument | 206 |
| MagNA Pure Compact Instrument | 209 |
| MagNA Pure LC Instrument | 208 |
| Magnetic glass particles | 166 |
| Magnetic particle separator | 175 |
| Master Mixes | 214 |
| Mechanical disruption of cells | 14 |
| Melanoma mRNA , detection of, see | |
| – mRNA Isolation Kit for Blood/Bone Marrow | 184 |
| mini Quick spin Columns | |
| – DNA | 200 |
| – oligo | 200 |
| – RNA | 200 |
| Mouse | |
| – blood, preparing DNA from | 142 |
| – tail, preparing DNA from | 23 |
| mRNA | |
| – Capture Kit | 170 |
| – Isolation Kit | 175 |
| – Isolation Kit for Blood/Bone Marrow | 184 |
| N | |
| Nucleic acids | |
| – hints for handling | 218 |
| – purification and isolation, overview | 14 |
| O | |
| Ordering informatio | 230 |
| Overview product | 10 |
| P | |
| Paraffin-embedded tissue sections, preparing DNA from, see | |
| – High Pure PCR Template Preparation Kit | 21 |
| preparing RNA from, see | |
| – High Pure RNA Paraffin Kit | 67 |
| PCR Enzyme dNTPacks | 214 |
| PCR Product Selection Guide | 213 |
| Plasma, see <i>Blood</i> | |
| Poly(A) ⁺ RNA, preparing | 170 |
| Precautions | |
| – for handling DNA | 218 |
| – for handling RNA | 219 |
| Protein, simultaneous isolation with DNA and RNA | 159 |
| Proteinase K, recombinant, PCR Grade | 234 |
| Purification of DNA fragments from agarose gel | 36 |
| Purification of PCR products from solution | 35 |
| Purifying nucleic acids, overview of | 14 |

| | |
|---|----------|
| Q | |
| Quantitation of | |
| – DNA | 222 |
| – RNA | 222 |
| Quick Spin columns | |
| – for purifying radiolabeled DNA | 196 |
| – for purifying radiolabeled RNA | 196 |
| R | |
| Rabbit blood, preparing DNA from | 140 |
| RACE, preparing RNA for, see | |
| – High Pure RNA Isolation Kit | 53 |
| Radiolabeled DNA/RNA, purifying, see | |
| – Quick Spin columns for radiolabeled DNA/RNA | 196 |
| Rat blood, preparing DNA from | 142 |
| Real-Time PCR Instruments | 216 |
| Red Blood Cell Lysis Buffer, see | |
| – High Pure RNA Isolation Kit | 53 |
| – TriPure Isolation Reagent | 156 |
| Ribonuclease, see <i>RNase digestion</i> | |
| RNA | |
| – hints for handling | 219 |
| – simultaneous isolation of DNA and protein | 159 |
| – temperature sensitivity of | 220 |
| RNA/DNA Stabilization Reagent for Blood/Bone Marrow | 183 |
| RNase digestion | 24 |
| RNA isolation from | |
| – bacteria | 58 |
| – cultured cells | 56 |
| – formalin-fixed, paraffin-embedded tissue sections | 70, 77 |
| – human blood | 57 |
| – mouse tissues | 62 |
| – tissue sections | 78 |
| – yeast | 58 |
| S | |
| Sections, fixed tissue, preparing DNA from, see | |
| – High Pure PCR Template Preparation Kit | 21 |
| preparing RNA from, see | |
| – High Pure RNA Paraffin Kit | 73 |
| Selection Guide | 8 |
| Serum, see <i>Blood</i> | |
| Shiga-like toxin genes, see | |
| – High Pure PCR Product Purification Kit, results | 40 |
| Silica Adsorption, overview | 18 |
| Silica matrix, see | |
| – Agarose Gel DNA Extraction Kit | 108 |
| Single-stranded oligonucleotides, purifying, see | |
| – Agarose Gel DNA Extraction Kit | 108 |
| Solution-based Isolation | |
| – overview | 138 |
| Stabilization | |
| – of blood or bone marrow lysates | 183 |
| – reagent for nucleic acids | 218 |
| Streptavidin-coated | |
| – magnetic particles | 178, 184 |
| – PCR tubes | 173 |

| | |
|---|-----|
| T | |
| Tables and formulas, conversion | 220 |
| Tissue sections, fixed, preparing DNA from, see | |
| – High Pure PCR Template Preparation Kit | 21 |
| preparing RNA from, see | |
| – High Pure RNA Paraffin Kit | 73 |
| TriPure Isolation Reagent | 156 |
| U | |
| Urine, preparing RNA from, see | |
| – High Pure Viral RNA Kit | 82 |
| V | |
| Vacuum Manifold, see | |
| – High Pure 96 UF Cleanup Kit | 113 |
